Sound Advice

Although it is certainly too early to appraise our new governor, particularly since his judgment and ability will be given serious tests at the next session of the General Assembly, we are pleased with his sensible approach to some of the problems which have confronted him.

We were particularly pleased with his advice to an appointee not to mix politics with performance of duty. We have felt that too often governmental agencies have been depreciated from their effectiveness because there has been too much factionalism and politics in the performance of duty. A person representing the public should think in terms of proper performance rather than political expediency. We hope our new governor will follow his stand in that direction consistently throughout his administration. If he does, we are quite sure that his administration will go down in history as having been a most successful one despite the acute complex problems facing the State at this time.

Our new governor's background not only indicates that he is a constructive thinker but also that his thinking is not shackled by reactionary policies.

We would like to take this occasion to pay tribute to our governor's early days in office as chief executive of this state and to wish him well during the trying days of the administration which are just ahead.
